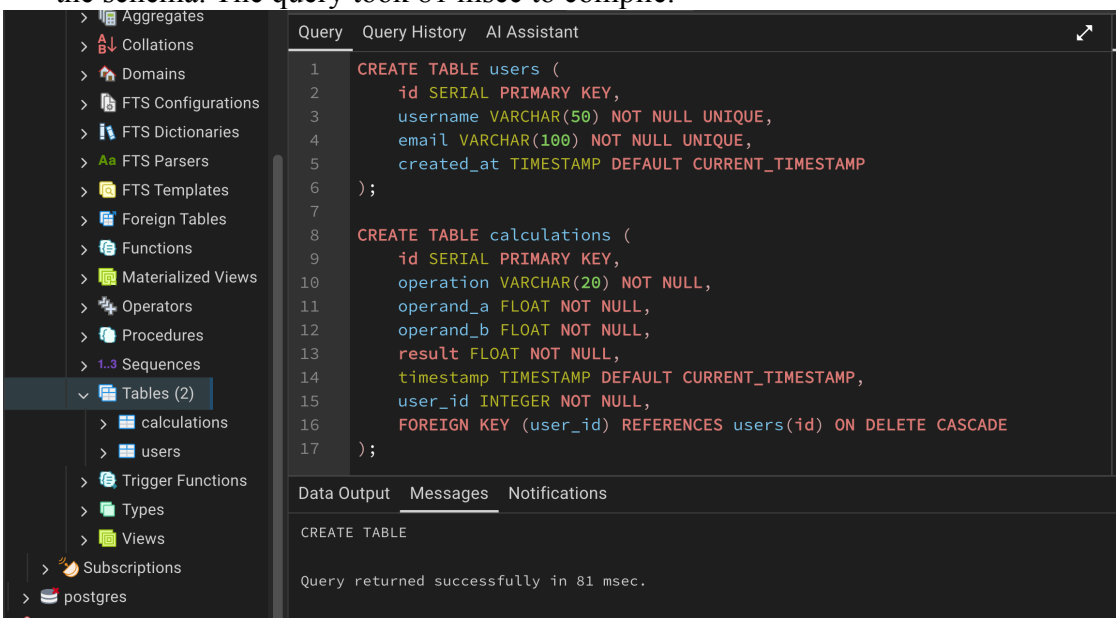
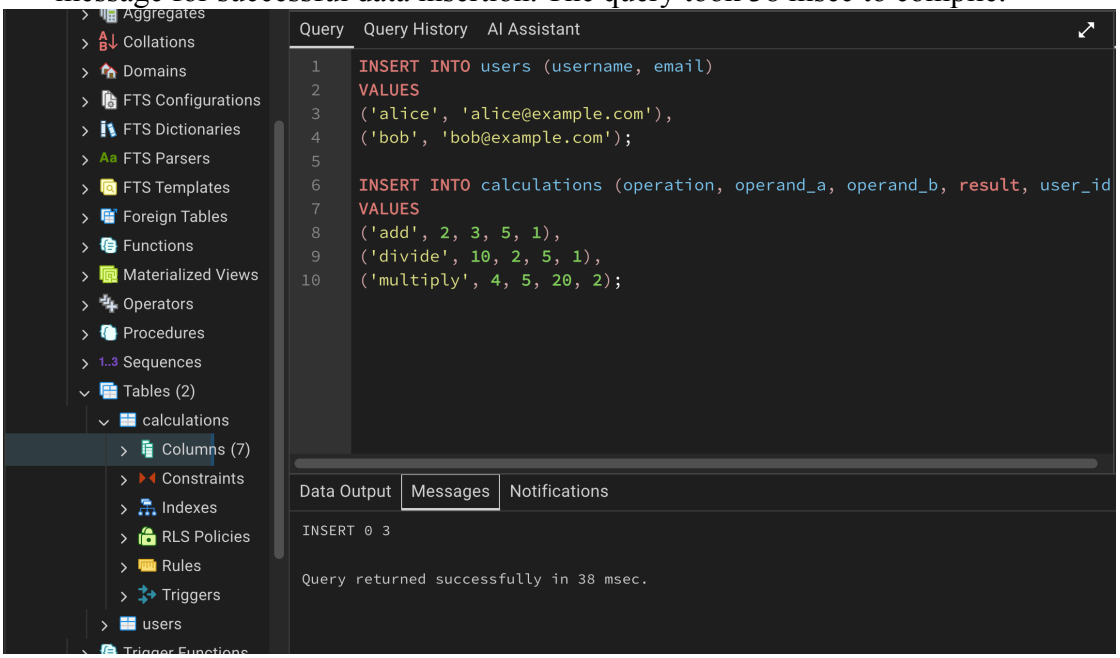
Assignment #9 Screenshots

A. Creating Tables within pgAdmin. The screenshot shows the SQL query, the output message indicating successful table creation, and the two new tables shown on the left-hand side in the schema. The query took 81 msec to compile.



B. Inserting Data into the create tables. The screenshot shows the SQL query and the output message for successful data insertion. The query took 38 msec to compile.



C. Retrieve data from selected tables. The first screenshot shows the SQL query and the message of a successful compile; this took 29 msec and 3 rows were affected. The second screenshot displays the actual result / data output from the query.

Query | Query History | AI Assistant

```sql
-- Retrieve all users
SELECT * FROM users;

-- Retrieve all calculations
SELECT * FROM calculations;

-- Join users and calculations
SELECT u.username, c.operation, c.operand_a, c.operand_b, c.result
FROM calculations c
JOIN users u ON c.user_id = u.id;
```

Data Output | Messages | Notifications

```
Successfully run. Total query runtime: 29 msec.
3 rows affected.
```

Query | Query History | AI Assistant

```sql
-- Retrieve all users
SELECT * FROM users;

-- Retrieve all calculations
SELECT * FROM calculations;

-- Join users and calculations
SELECT u.username, c.operation, c.operand_a, c.operand_b, c.result
FROM calculations c
JOIN users u ON c.user_id = u.id;
```

Data Output | Messages | Notifications

Showing rows: 1 to 3 | Page No: 1

	username character varying (50)	operation character varying (20)	operand_a double precision	operand_b double precision	result double precision
1	alice	add	2	3	5
2	alice	divide	10	2	5
3	bob	multiply	4	5	20

Total rows: 3 | Query complete 00:00:00.029

D. Updating data values within tables. This screenshot shows the value update within the table ‘Calculations’. The output message shows a successful compile, running in 41 msec.

Query Query History AI Assistant

```
UPDATE calculations
SET result = 6
WHERE id = 1;  -- or whichever row you want to update
```

Data Output Messages Notifications

```
UPDATE 1

Query returned successfully in 41 msec.
```

E. Deleting data values within tables. This screenshot shows the value deletion within the table ‘Calculations’. The output message shows a successful compile, running in 47 msec.

Query Query History AI Assistant

```
DELETE FROM calculations
WHERE id = 2;  -- example record to remove
```

Data Output Messages Notifications

```
DELETE 1

Query returned successfully in 47 msec.
```

Docker Sucessfully running - All three containers built/running (Postgres, PgAdmin, FastAPI)
